ABOUT

For the last 2 years, I have been involved in programming languages such as JAVA, JAVASCRIPT, HTML, CSS, SASS and C#.

Prior to this, I worked in the banking and financial sector for over 14 years. These roles allowed me to develop leadership and management skills, as well as effective communication and collaboration skills. I am used to remaining calm while working in high pressure environments, and I have strong problem-solving skills.

In the last year I studied and trained in the IT area, by taking Web Development courses, as well as undertaking the Systems Analyst career in ORT Institute in Buenos Aires.

I'm looking for a new challenge that would allow me to further develop my system analyst skills.
